(5) The Executive Engineer, Town Planning wants money for preparation of Survey maps of Towns for facilitating preparation of Improvement projects Municipal Councils, it is said, take time to give their consent, and in the meanwhile work is held up The Chief Engineer proposes that the maps may be prepared out of Government funds and the cost recovered from the respective municipalities later This does not seem desirable The consen of the Municipal Councils should be obtained in all cases before undertaking surveys Otherwise the cost might have all to be paid by Government as appears to have been done in some cases in - 1925 In a few cases formal consent may take - time In such case an advance from which the Executive Engineer can carry out the work in anti cipation of formal consent would be helpful A sum of Rs 250/- from the balance of the grant fo town improvements this year may be given to the Executive Engineer for this purpose The amount would have to be recouped from time to time from the municipalities for which work is done There seem to be no standing orders re the manner of meeting the cost of such surveys. There is an order dated 27.8.25 stating that surveys costing not more than Rs 100 in each case and not Rs. 1000 in the aggregate may be - carried out by the Executive Engineer Sanitary

Secretary
Chief Secretary } To I do not think the draft order fully meets the difficulties as explained by the C.E. on the request of the Chief Engr. made in para 1 of his letter of 3 Aug

The points for consideration are:-

Firstly who has to bear the cost of surveys, whether the expenditure should be debited to the Govt.

Secondly - How should funds be placed at the disposal of the C.E. for expenditure to fund-work may not be suspended when there is delay in the Govt. Communication is made.

The third point has been settled in the affirmative by the Chief Secretary.

I presume that the cost of surveys will be wholly met by the

NOTE—Contd sheet.

General and Revenue Secretariat — Pol File No 224 of 1926

Serial No.

Municipalities concerned, each of them as are in need of help being given a subvention from the amounts provided under Sub-head- for P 9

On this understanding there will be no financial charge hereafter on account of Surveys in Towns.

Secondly as regards the provision of funds, the procedure adopted in the case of Bangalore Water Supply Maintenance may be followed.

The P W D may be permitted to incur expenditure on surveys against a suitable provision made in the budget under the grant of Rs. - for the purpose, and the receipts made from the Municipalities may be taken credit for as deduction of expenditure - The gross grant- and the net- real grant will be shown in the budget -

This arrangement- presumes that- the P W D will take care to incur expenditure after obtaining the consent of the Municipalities concerned before the close of the year.

In the light of the foregoing remarks I have no objection to the proposals in Mudaliar's

MYSORE PUBLIC WORKS DEPARTMENT
CENTRAL OFFICE

Dated Bangalore 27 May 1927

JOHN BHORE Esq AMICE E
Chief Engineer of Mysore
Bangalore

R Ranga Rao, Esq , B A , B I ,
Secretary to Government, General Department,
Bangalore

I have the honour to forward herewith a copy of letter No 521 lated the 13th April 1927, from the Executive Engineer, Sanitary and own Planning Division, bringing to notice the difficulties experienced him in the matter of preparing projects for Town Improvements, Water pply and Drainage, etc , and to request you will be so good as to range needful provision being made in the Draft Budget for the next fficial year under "30 Grants for Public Improvements," for the pur- e of preparing survey maps for all important towns in the State he cost and thus incurred in advance from the State Funds may eventual- ly be debited to the Municipalities either at the time projects are pared or earlier as Government direct This procedure will facili- ate work in the Division

2 Orders of Government may also be obtained and communi- ated early to utilise the balance out of the grant allotted for your Town for other works

I have the honour to be,

S i r,

Your most obedient servant,

26 5 27

th Chief Engineer of Mysore

Letter No 521 dated the 13th April 1927, from the Executive Engineer, Sanitary and Town Planning Division, to the Chief Engineer of Mysore, Bangalore

---

I have the honor to state that absence of Survey Maps for most of the Towns in the State is much in the way of speedy and prompt compliance of requisitions for preparing schemes for Drainage, Water Supply and Improvements to Towns and every time such a requisition is received, the survey of the town is to be commenced in consultation with the concerned Local Body which has to place at my disposal the cost of survey in those cases in which it exceeds Rs 100 - Not less than 3 to 4 months will lapse before the local body can, after going through all the formalities it has to observe, make the amount available, and there, will thus be very great delay in furnishing the required Schemes and Plans for the improvements sought I, therefore, consider that it is a matter of primary importance to see that, all the towns in the State are surveyed and survey maps prepared and kept for reference whenever required

A beginning was made in the year 1917 with same purpose in view and due to financial stringency no progress could be made in this direction after 1919 and the programme was dropped there But now, with the impetus given by the Dewan in the matter of Town Improvements etc , the Local Bodies are all coming forward with requisitions for town improvements, laying out of Extensions, Drainage and Water Supply schems, etc No prompt assistance however much I wish can be rendered to them without proper maps of town One is much handicapped in preparing these schemes without any plans of the towns

In order to partially overcome the delay that would otherwise be caused, it was proposed by me to incur from Government funds the cost of surveys of towns, which would not exceed Rs 100 and a sum of Rs 1,000 was sanctioned by the Government under "30 Grants & 3 Improvements of Towns and placed at my disposal for the purpose An outlay of Rs 728/- has so far been incurred leaving

a balance of Rs 272/- which will be required for other petty works that may come up in these next three months But in the meanwhile surveys of the towns of Sagar and Sallespur have to be started immediately as per orders of the Dewan Sahib in his recent tours in the Districts of Shimoga and Hassan The Sagar Municipality which was requested to place a sum of Rs 250/- for the cost of surveys, some two months back, has neither complied with the requisition nor replied as to when they would be able to make the amount available The Budget of the Municipality, which was framed long before this requisition, might not allow this sum of Rs 250/- being made available this year, and the question might be pending disposal with them for some such disability, with the result that the works ordered by the Dewan Sahib cannot be proceeded with and completed promptly I therefore beg to propose that a sum of Rs 750/- from the grant of Rs 2,500/- allotted for the layout of Hariyur town under "30 Grants - 3 Improvements" being reappropriated for this purpose and permission kindly granted to meet the cost of the surveys of these two towns from the amount so reappropriated Savings to this extent, viz , Rs 750/- are effected in the layout of Hariyur Town Extentsion which is since completed

Further, I also beg to propose that, under the circumstances stated above, a sum of Rs 5,000/- may kindly be provided in the next year's budget under "30 Grants - 3 Improvements of Towns" for the purpose of surveying towns in the State and placed at the disposal of this Division, which will sanction the estimates therefor and carry out the surveys as occasion arises In course of 3 or 4 years most of the towns in the State can be surveyed and survey maps set up without much trouble as an expenditure of Rs 5,000/- year by year will not interfere with the State Budget as it would if the expenditure is to be taken over the budget of one year alone

In favour of an early sanction to the proposal is solicite

Leg mr T K S Ref

Read -

Correspondence ending with letter No 1808 dated the 27th July 1927, from the -- Chief Engineer, forwarding a copy of letter received from the Executive Engineer, Town Planning and Sanitary Division regarding -- the survey of towns and requesting that provision may be made under "30 Grants for Public Improvement" for the purpose

---

ORDER NO L 5266-75/LR5224-26-2

Dated Bangalore the 6th March ~~February~~ 1928

It is reported that survey of Towns have to be made in connection with the preparation of projects for town improvements, Water Supply, Drainage etc , that progress in this work is not possible if the work is to be done after consulting the Council and after recovering the cost of survey

This order could as well be read like the Secretary's H L Roode

The Chief Engineer therefore, propose that from 1928-29 provision may be made under "30 Grants for Public Improvements for the survey of important towns the cost being debited to the municipalities concerned either at the time the projects are prepared or earlier as Government may direct

Government consider that the above procedure will entail writting off large sums in case the Municipalities concerned decline to bear the charges on the score that survey is not undertaken on the

their request or that they are not consul ed in the matter beforehand or if they -- plead inability to meet the entire charges The Government had to write off a large -- sum once before on account of a similar -- scheme

As Government are giving grants for Town Improvements it will be a simple and easy procedure tomake the cost of the -- surveys a first charge on such grants -- whenever such a survey is made on behalf of a Municipal Council where no such --- grant is given to a Municipal Council the cost should be met from the Municipal - - Funds The Councils should generally be consulted as to the survey, [illegible]
